

PREVENTIVE SCREENING SERVICES

Beaumont Executive Health Services offers a broad range of preventive screening services targeted at detecting early signs of health problems. In addition to the services provided at your Executive Health appointment, our program has access to a wide array of specialty departments and consultants throughout William Beaumont Hospital. For your reference, we have enclosed a partial list of studies available through our program, along with corresponding charges.

Many of the preventive studies offered through Beaumont Executive Health Services can be grouped together in a variety of combinations based on your particular corporate requirements. We would welcome the opportunity to discuss how we can best personalize our program to meet the needs of your company. At your request, we also offer confidential consultations to assist you in reducing your corporate healthcare expenditures.

It is important to keep in mind that any screening measure or diagnostic test can uncover underlying health problems, which may necessitate further evaluation by a primary care physician or specialist. Members of corporate groups should be advised to consult company policy regarding coverage of specific medical evaluations. If at any point a client would like assistance in locating a personal physician, we will gladly assist him or her in doing so.

If you have any questions or would like additional information about our program or other available studies, please do not hesitate to contact Dr. Lewis Rosenbaum, Dr. Joseph James, or our administrative manager Carol Sue Martin:
